

SAFE Framework – How We Use It

A structured way to build with AI and deliver with confidence

KEY ROLES INVOLVED

STAKEHOLDER / PRODUCT OWNER
Defines the problem, goals, and success criteria.

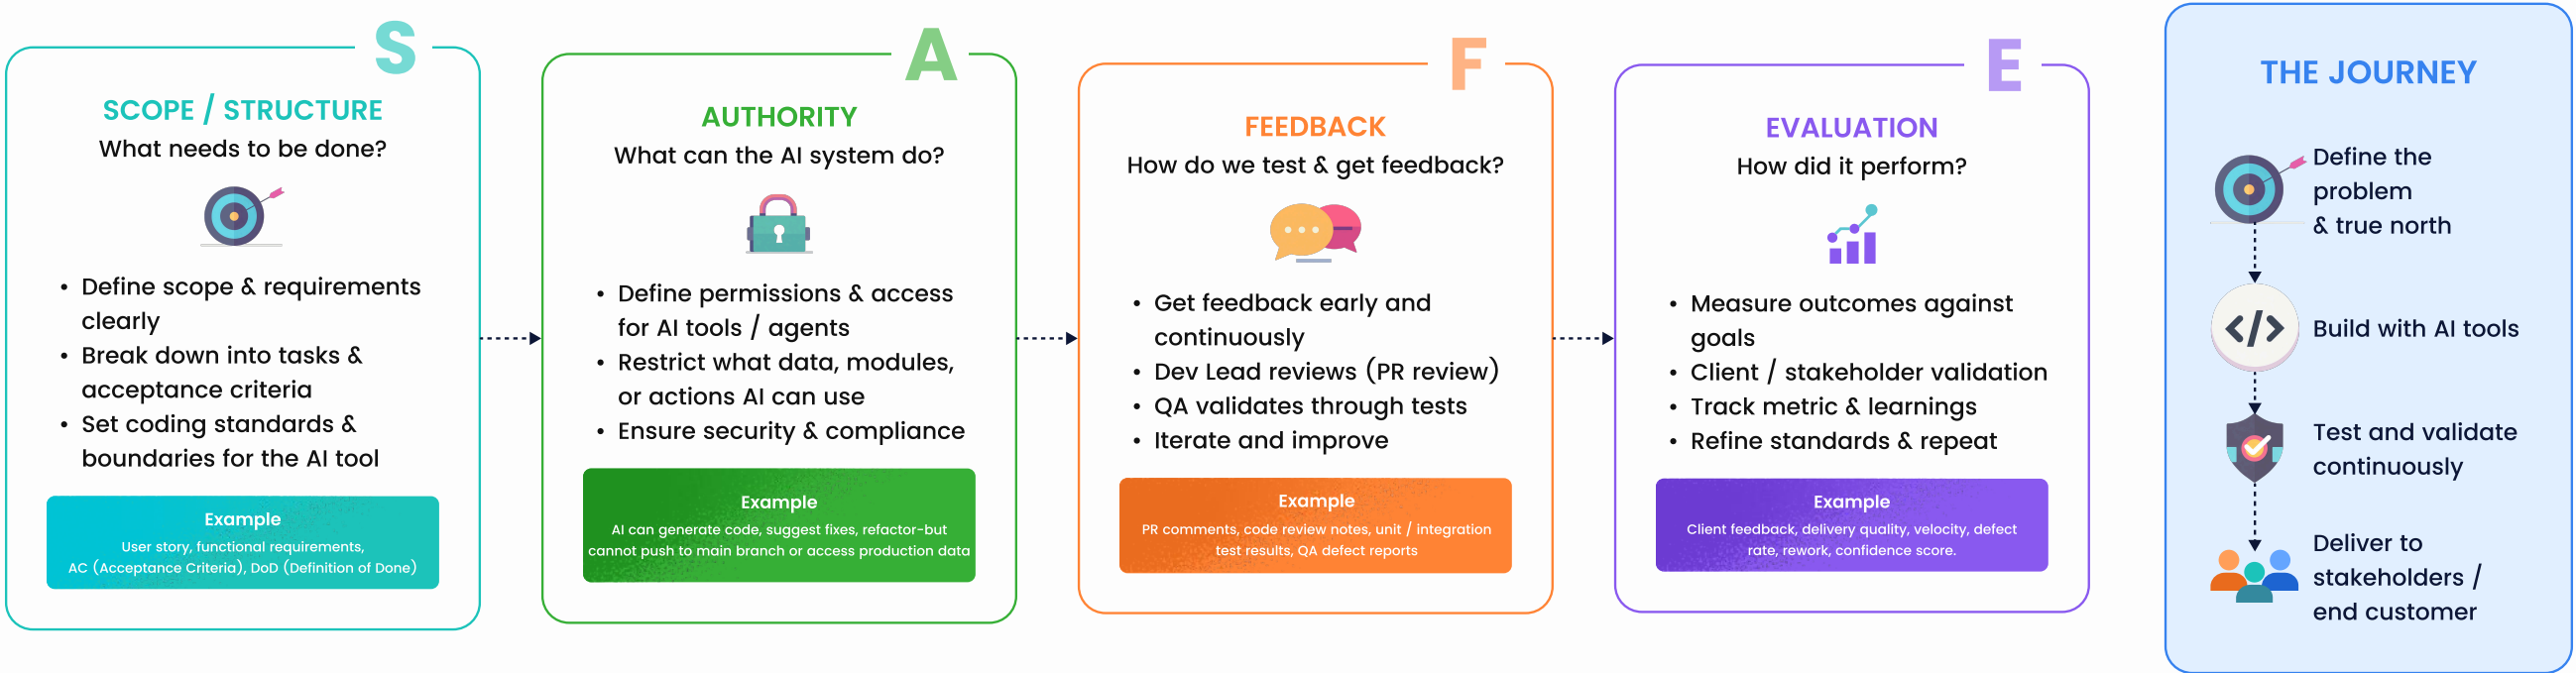

ENGINEER / DEVELOPER
Uses AI tools to build code and solve the problem.

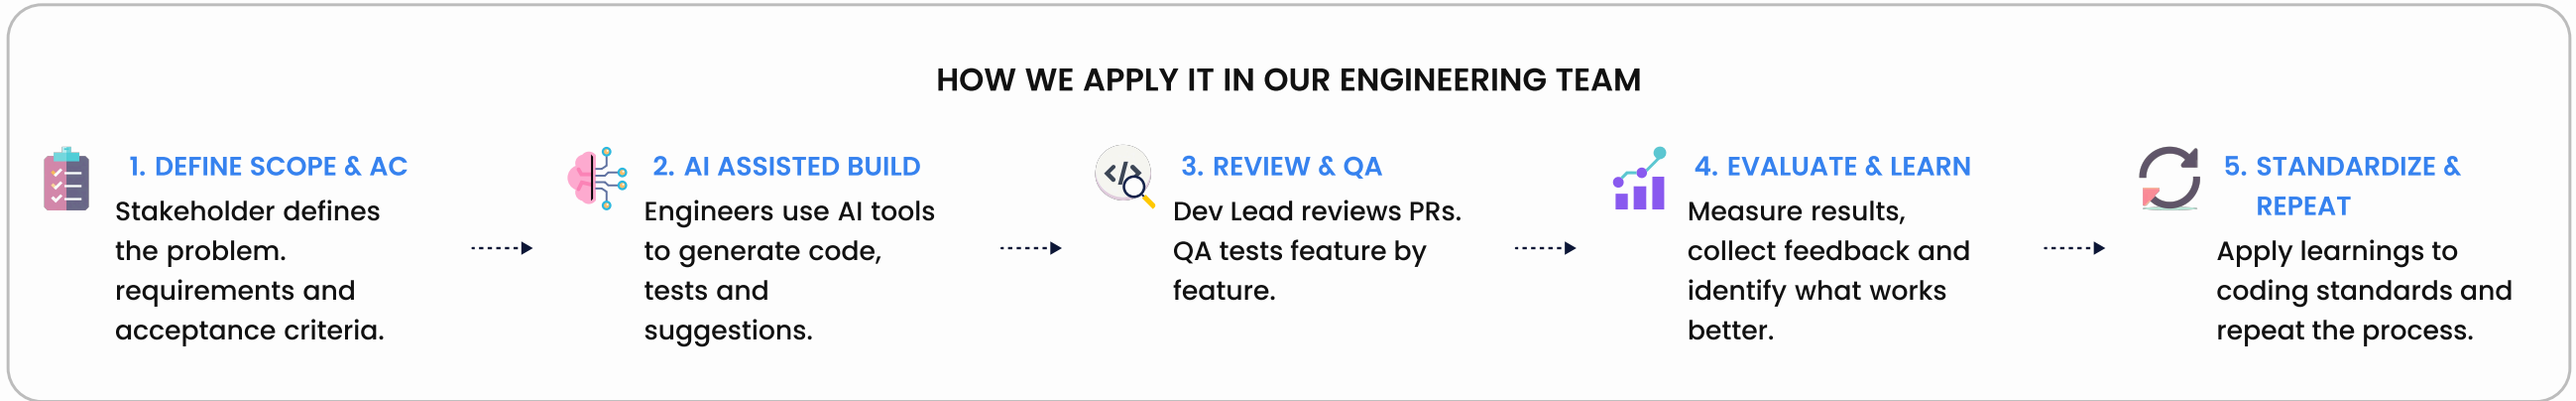

DEV LEAD / QA ENGINEER
Reviews code, tests it and ensures quality and standards.

SAFE FRAMEWORK

HOW WE APPLY IT IN OUR ENGINEERING TEAM

WHAT WE ACHIEVED

- Faster development with AI assistance
- Better visibility and control over code quality
- Stronger collaboration between Dev, QA and Stakeholders
- Consistent process that we can measure and improve

KEY METRIC WE TRACK

WHY SAFE WORKS

It brings clarity, control and continuous learning across people, process and AI tools – from the first line of code to the final delivery.

Bottom Line: SAFE helps us build with AI responsible, improve quality continuously and deliver value to our customers with confidence.
